To build SenTindra, a virtual security operations center that will offer a single pane of monitoring to address immediate security threats

New Jersey / New Delhi – April 6th, 2022: Tech Mahindra, a leading provider of digital transformation, consulting, and business re-engineering services and solutions, today announced that it has collaborated with Microsoft to provide next-generation integrated security solutions for customers. As part of the collaboration, Tech Mahindra and Microsoft will build SenTindra, a cloud-based virtual security operations center developed on Microsoft Sentinel. SenTindra offers a single monitoring pane with all security components integrated to assist in immediate addressing of security threats and thereby giving customers an improved security posture.

With Tech Mahindra's secure assessment and migration approach backed by Azure's security features, SenTindra will cover the entire lifecycle of the migration and transformation requirements for a seamless and secure experience for customers. This collaboration will enhance security, simplify access, and set smart policies across customers' different cloud environments.

Kunal Purohit, Chief Digital Services Officer, Tech Mahindra, said,

“Cyberattacks today are more advanced than ever before, hence there is a need for a holistic next generation security solution that brings data aggregation, analytics, visibility, orchestration, AI (Artificial Intelligence), ML (Machine Learning) capabilities bundled together. Through this collaboration we will provide the ‘SenTindra’ platform that will enable enterprises to experience focused industry use cases and custom solutions on Sentinel’s next generation cloud native and scalable SIEM (security information and event management) solution.”

By using Microsoft Sentinel’s AI-enabled data aggregation and analyzing capability, and Tech Mahindra’s MSSP (Managed Security Service Provider) capabilities, this collaboration will help in improving customers’ security posture by providing ready to use templates that help collect, detect, investigate and respond to security threats. Additionally, it reduces delivery risks and assessment phase timelines for customers.

Vasu Jakkal, CVP, Microsoft, Security, Compliance, Identity and Privacy, said, *“With the launch of the ‘Sentinel Showcase Labs - Sentindra’, global customers will have a platform to experience various custom-built and very relevant scenarios focused on the need of specific industries and business environments and demonstrate the holistic end-to-end features of our scalable SIEM (security information and event management) & SOAR (Security Orchestration, Automation, and Response) solution.”*

Tech Mahindra provides a comprehensive suite of services spanning the entire lifecycle of the security journey for our customers. The collaboration is in line with Tech Mahindra’s NXT.NOWTM framework, which aims to enhance ‘Human Centric Experience’ by focusing on increased investment in emerging technologies and solutions that enable digital transformation and meet the evolving needs of the customer.
